Strategy for implementing the risk management policy	4
Dissemination and review of the risk policy and strategy.....	7

PURPOSE OF THE POLICY

1. The purpose of the risk management policy is to explain the Office of the Auditor General's ("OAG" or "Office") approach to risk management and to outline the key principles, strategies and responsibilities for the management of risk for the organisation.

OBJECTIVE OF RISK MANAGEMENT

2. The objective of undertaking risk management is to provide a systematic way of identifying, recording, monitoring and reporting on risks that the OAG is managing so it is able to meet its objectives.

PRINCIPAL POLICIES

3. The identification and management of risks affecting the OAG's ability to achieve its objectives as set out in the Office's Strategic Plan and other planning documents, such as Annual Budget Statements, are key responsibilities of all members of staff and partners involved in the OAG's work.
4. The effective management of risk is an important means by which the OAG achieves its goals. To that end the OAG's policies are to:
 - manage risk actively across the full range of the OAG's activities;
 - devolve responsibility for risk ownership and management to the most appropriate level whilst maintaining clear senior management overall responsibilities;
 - integrate risk management with corporate planning;
 - encourage a risk aware way of working;
 - accept levels of risk that are compatible with our professional responsibilities and take into account stakeholder expectations; and
 - monitor and report regularly on the management of risk.

NATURE AND CONTEXT OF RISK

5. Risk can be defined as the threat that an event, action or inaction will adversely affect the OAG's ability to achieve its objectives.

6. Risks can be strategic or operational in nature and the OAG will be able to control some risks, influence others but only mitigate the impact of those risks that are outside of its control or influence. Risk management takes these factors into account in judging the acceptable level of risk and the actions needed to reduce the risk level.

STRATEGY FOR IMPLEMENTING THE RISK MANAGEMENT POLICY

ROLES AND RESPONSIBILITIES

7. Risk management is an integral part of the overall governance arrangements of the OAG. As such there are specific responsibilities for people and groups undertaking different roles in the Office.

Auditor General

8. The Auditor General has ultimate responsibility for the management of risk within the OAG. His role includes:
 - setting the tone at the top for risk management throughout the organisation;
 - approving the overall risk management arrangements including this policy and the appetite for risk; and
 - considering reports on the operation of risk management.

Management Team

9. The Management Team has day to day responsibility for the management of the system of internal control including risk management. Its role includes:
 - fostering a culture of risk awareness and risk management;
 - consideration of draft risk policies, strategies and registers;
 - ensuring that risks and risk management are included in project proposals or work plans presented to it for consideration or approval; and
 - ensuring that there is ownership for all significant risks by a member of the Management Team.

Staff and partners

10. Members of staff and the partner firms that act as appointed auditors or contractors are expected to:
- be familiar with the OAG's policy on and approach to risk management;
 - to be risk aware in their work;
 - to take responsibility for the ownership of risks assigned to them;
 - to inform managers if they become aware that business objectives could be at risk; and
 - to take a corporate approach to risk by considering the implications for the whole organisation of individual risk management actions.
11. This risk management policy and the risk register will form part of the induction training for new staff.

RISK REGISTER

12. The OAG will maintain a corporate level risk register under the ownership of the Auditor General. The register will be updated and considered by the Management Team at its corporate management meetings. A full annual update will be carried out in parallel with budgeting and planning cycle.
13. The risk register is intended to be a dynamic document reflecting the fact that risks may change between formal reviews. The register will be updated between reviews to reflect changes in risks as they are identified.
14. The risk register is intended to cover corporate wide risks and risks to corporate developments. Risks to individual audits, studies and projects should be recorded and reported through operational planning and monitoring processes unless they are so significant or pervasive that they pose a risk to corporate level objectives. For example, a delay to an individual audit or report would not normally appear on the corporate register, but delays to a whole range of audits may appear if that represents a risk to meeting corporate delivery or quality objectives.

Structure of the risk register

15. The register will group risks by category and should include the following components for each risk:
- gross risk assessments of likelihood and impact;
 - controls/actions in place to mitigate the gross risks;
 - net risk assessments of likelihood and impact;

- further actions or monitoring required including timescales and reference to any relevant KPIs; and
- identity of risk owner.

16. The categories the risks should be grouped under are:

- Strategic e.g. reputational, independence
- Compliance e.g. legislation
- Financial
- Operational e.g. incorrect opinion
- Environmental e.g. natural disasters
- Employee e.g. maintaining sufficient staff, up to date skills
- Health and safety

Risk scoring and risk appetite

17. The likelihood and impact of each risk should be scored in accordance with Table A below.

18. Traffic lights will be used to identify the highest scoring net risk assessments which will be those requiring the greatest Management Team attention. For net risk assessments Table B indicates the OAG’s appetite for different levels of risk.

Table A

		LIKELIEHOOD				
IMPACT	Multiplier	Rare	Unlikely	Possible	Likely	Almost Certain
Multiplier		1	2	3	4	5
Fundamental	5	5	10	15	20	25
Major	4	4	8	12	16	20
Moderate	3	3	6	9	12	15
Minor	2	2	4	6	8	10
Insignificant	1	1	2	3	4	5

Table B

Net risk assessment	Risk appetite response
20-25	Unacceptable level of risk exposure which requires immediate corrective action to be taken
12-16	Unacceptable level of risk that requires constant active monitoring and action to be taken to reduce exposure
5-10	Acceptable level of risk exposure subject to regular active monitoring Measures
1-4	Acceptable level of risk exposure on the basis of normal operation of controls in place

Template risk register and example entry

19. A template for the corporate level risk register is attached.

OTHER RISK MANAGEMENT ARRANGEMENTS

20. Risk management will also be included in the project planning for major corporate projects. The nature and extent of documentation will depend on the significance of the project and the risks involved.

DISSEMINATION AND REVIEW OF THE RISK POLICY AND STRATEGY

21. This policy and strategy will be published on the OAG’s website and available to all staff. The policy will be reviewed at least every two years.

RISK REGISTER TEMPLATE

Risk Description	Gross Risk			Controls in place	Net Risk			Further action	Risk Owner
	Likelihood	Impact	Total		Likelihood	Impact	Total
